

# HECAT® ENGINE COOLING PULSATOR®

- Quick-Effective-Powerful
- Complete Flushing Tool
- No Chemicals Required

The Original Patented Pulse Process produces a true kinetic energy pulse to dislodge restrictive buildups.

Particulates are then lifted, suspended, and carried out in the pulsing outflow.

Are you seeing more of this?

- Comebacks for Repeat System Problems?
- Repeat Water Pump Failures & Parts Erosion?
- Repeat "NO HEAT" and Clogging Core Issues?
- Hot Spots and Erratic Engine Cooling Issues?

One of every four vehicles on the road today has a neglected, contaminated, and dirty cooling system. Traditional fluid exchange "flushing" machines, garden hoses, flushing tee, etc. are not removing the restrictive system buildups and

component damaging abrasive particulates; these methods just flow over and around the root problems. Stop chasing symptoms, changing parts, fix the problem, earn profits, and please your customers; by efficiently cleaning, clearing, and restoring the entire engine cooling system (radiator, heater core, block, heads, and intake).

**HECAT® Products**  
Consistently Meet or Exceed  
OE Service Standards.
