

SAFE-FLUSH®

- Premium Air Conditioning Flushing Fluid
- Transmission Oil Cooler Flushing Fluid
- Low V.O.C. Parts Degreasing Fluid

SAFE-FLUSH® is a synthetic hydrocarbon blend; specifically formulated to target (Petroleum & Synthetic Lubricants), dissolve (heat & failure related contamination), and Flush out ALL types of Air Conditioning & Refrigeration Oils. Also used for Flushing Transmission (and other) Oil Coolers.

Low Odor – Low Toxicity – Low Flammability

SAFE-FLUSH® is compatible with all common system materials, emits a friendly citrus odor, and meets the need for a Environmental, Health & Safety (EHS) compliant option; for internal heat exchanger flushing and other precision cleaning and degreasing projects.

If you are looking for SAFE-FLUSH A/C or SAFE-FLUSH Trans.
This is the same product, same formula; now just packaged as SAFE-FLUSH.
