THE WATER HAMMER

Swimming Pool & Plumbing Line Pulsating Flusher

“Maintenance Free Operation”

The Patented HECAT® PULSATOR® process converts air and water pressure energy into high frequency, high flow, and low pressure kinetic energy pulses. This tool is used to safely clean, move, and remove debris and obstructions from swimming pool & other plumbing lines; without producing any pressure damage!

An Effective Alternative to...

- Snaking (Too Many Elbows!)
- Hydro-Flushing (Much Less Effective!)
- Carbon Dioxide (Difficult to Regulate)
- Divers (Very Expensive!)
- Busting Concrete – Digging it up!
- Repeated Service Calls!
- Unhappy Customers & Wasted Time!

Made in U.S.A. – U.S. Patent 5615695

Kit includes: Pulsating Gun Assembly, Whip Hose (for tight spots), Primary Rubber Tip, Mini Cone, Large Cone, Backflow Preventer, Mini Ball Valve; All in a Durable and Quality Storage Case.

◀ For smaller lines - Mini Cone inserts into end of Primary Tip.

For larger lines - Primary Tip goes in back of Large Cone ▶

Everything you need for 1/2 thru 4 inch lines!

- For Routine Pool Maintenance - To preserve free flow for proper filtration.
- For Problem Pools & Lines - To remove rocks, leaves, plaster, gunite, pool toys etc.
- For Construction Debris - To clear water lines & conduits prior to final finish of project.
- Requires: Garden Hose Supply (Backflow Preventer Included) and Compressed Air (or Nitrogen).

This Tool Can Pay For Itself In the First Week of Use!
