HECAT® Receives PTEN Innovation Award

cygnus

Professional TOOL & EQUIPMENT NEWS

WINNER

2008 PTEN Innovation Awards

Company: HECAT
Product: Coolant Pulsator

Sludge-like substances are clogging "long life" antifreeze equipped vehicles' cooling systems, leading to overheating, internal, and external leaks, and cooling system parts failure. Various cooling system flushing guns, flushing tees and other methods, both professional and home made have been around for a long time. HECAT found that by adding its proven, durable, and patented "Pulsating" scrubbing action, it produces a whole new level of cleaning effectiveness; required for this necessary and needed service. The Coolant "Pulsator" will quickly scrub the internals of the cooling system with its high frequency, high flow, and hard hitting "water hammer" pulsing action; removing scale, sludge, sediment, casting sand, and other deposits. The included accessories provide for easy access to flush the heater core, radiator, and block. The flushing gun has a variable flow rate and a trigger lock that can be employed for hands free flushing, as long as necessary.
