

## Press Release

For Immediate Release

November 2014

### **HECAT® introduces NEW 200 Series Portable Pulsator® Flushers**

The HECAT® 200 Series has a complete new redesign for 2015. Previously exposed valves, tubing, and return filter have all moved inside a protective control box with a stainless steel laser cut control panel. In addition to the adapter kit; a incoming air filter/dryer and 2 gallons of SAFE-FLUSH® have been added to the standard packaging to complete this tool as “ready to use” out of the box. A Lifetime Warranty is available with exclusive use of SAFE-FLUSH®.

The **FAC-200 Pulsator®** A/C flusher version includes the FAD-100 Universal Adapter Kit and is an excellent choice for the valuable space on mobile service trucks and for climbing work on agricultural, construction, mining equipment, and much more.

The **MARK II Pulsator®** Transmission Oil Cooler flusher version includes the Trans Oil Cooler & Line Adapter Kit and is a perfect economical option for low volume Transmission shops and the growing need for General Repair Shops to tool up for Reman installs.

HECAT, Inc. is a manufacturer of specialty internal heat exchanger flushing and cleaning equipment, tools, adapters, chemicals, and procedures for automotive, aviation, fleet, and industrial services. HECAT® products are designed to be an integral part of any proper air conditioning, automatic transmission, engine cooling, and system decontamination, reconditioning, and repair process.
