

HECAT® has been producing the Solvent Pulse Flushers since 1982. As we constantly strive to make better products; new patents, developments, and materials come along, which will often drive us to abandon older designs, for new.

Many have used a Pulse Flusher in the past, and are often looking for something similar today. Since there was much private or no branding done in our early years, many do not know, they may have already used a HECAT® Pulse Flusher. When they describe that old tool they used, it will often be one of these below. They are just better today.

The "Hamburger"

The "Pulsator"

The "Pulsator II" – Robinair 17550

The "FAC-500" – Robinair 17570 – Viper VR-ACF

The "FAC-300" or "MARK III"

The early "FAC-200" or "MARK II"
